

# ECLynx EDI Solution

Easy to use Web EDI Solutions

## Getting pressured to be EDI capable?

Are your customers asking you to receive their orders and send them invoices electronically? Are your suppliers requesting that you send them orders via EDI? Do you want to accommodate their requests but don't have the time, money or EDI experience to make it happen? Well ECLynx is the solution to your problems. We have designed an easy to use Web Service to facilitate trading business documents in EDI format with your business partners.

Receiving Orders from your customers is simple. They send 850 or 875 EDI purchase orders to your EDI Id and ECLynx does the rest. The system retrieves your orders, translates them from EDI format, and displays a simple display on a web site. From there you can view, print and download the orders. Key punch them into your accounting system or take it to the next level and import them and eliminate errors and time spent manually entering them.

Sending Invoices is easy too. Create your invoices in your accounting software and export rather than print them. Log into ECLynx and upload them and we take it from there. They are translated into 810 or 880 EDI Invoices and transmitted to your customer. We can also load a small timer program EC Remote onto your PC. It can automate the upload of your invoices to us and eliminate the need to log into ECLynx directly.

Become EDI enabled. Send electronic business documents to your suppliers and customers.

Be more efficient!

### ECLynx Capabilities:

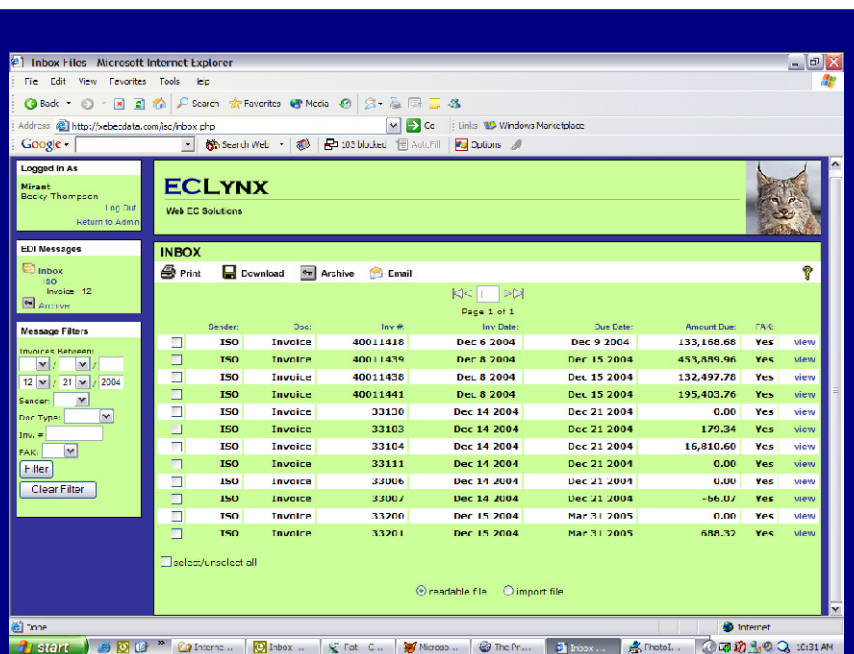

- ECLynx can connect to your Trading Partners using traditional EDI Networks, Secure FTP or AS2 (setup costs apply)
- View Orders on line and turn them into Invoices and ASNs. Simply select the order, select Turnaround, enter a few additional fields and press the Send button. Easy as that.
- Full archiving capabilities. All documents sent or received via ECLynx are accessible to view and print for up to 90 days.

### Pricing:

Subscription Setup:	\$100
Trading Partner Setup:	\$ 75
Monthly Subscription:	\$ 75
Per Document Fee:	\$.50
Custom Integration Program:	\$400

### Subscription Features:

- We will send you a bill monthly based on the actual transmissions sent during each month
- Setup can usually be completed within a week.
- The ECLynx subscription gets you unlimited technical support during business hours.
